

RANDI NANDIKA DANENDRA

DATA ANALYST / DATA SCIENTIST / DATA ENGINEER INTERN

randizelda30@gmail.com • +62 819-957-3818 • Surabaya, East Java

[LinkedIn](#) • [GitHub](#) • [Portofolio](#)

PROFILE

Applied Data Science student at PENS with hands-on experience building end-to-end data solutions, from data cleaning, exploratory data analysis, and feature engineering to machine learning models (classification, forecasting, recommendation systems) and production deployment using Python, SQL, and REST APIs. Skilled at turning raw data into insights and dashboards that support business decision-making. Seeking a Data Analyst / Data Scientist internship.

EDUCATION

Politeknik Elektronika Negeri Surabaya (PENS) **2024 – Present**

Bachelor of Applied Data Science (D4) • GPA 3.71 / 4.00 • Surabaya, East Java

- Relevant coursework: Applied Statistical Analysis, Data Mining, Machine Learning, Data Warehousing, Business Analytics for Data Science, Data Management, Database Systems, Data Exploration & Visualization

SMAN 1 Boyolangu Tulungagung | *Mathematics and Natural Science*

2021 – 2024

Tulungagung, East Java

PROJECTS

IntegrityView: Integrity Zone Monitoring Dashboard **Sep 2026 – Present**

Data Analyst · PENS Zona Integritas

github.com/RandiBro234/IntegrityView-PENS

- Developing a data monitoring dashboard supporting PENS's Zona Integritas (Integrity Zone) initiative, tracking institutional integrity and compliance indicators.
- Handle data collection, cleaning, and visualization to give real-time insight for internal monitoring and reporting.

Tech: Python, SQL, Data Visualization

AustraliaRainPrediction: Next-Day Rainfall Prediction System

Jul 2026

Data Scientist

github.com/RandiBro234/AustraliaRainPrediction

- Built an end-to-end machine learning project predicting next-day rainfall in Australia using the WeatherAUS dataset.
- Performed EDA, preprocessing, and feature engineering, then compared CatBoost, XGBoost, Linear Regression, and Random Forest.
- Conducted hyperparameter tuning and threshold optimization to improve model performance.

Tech: Python, CatBoost, XGBoost, Scikit-learn, Random Forest, Pandas

FaultSense: Predictive Maintenance System for Machine Fault Detection

Mar – Jun 2026

Machine Learning Engineer · Project Based Learning

github.com/RandiBro234/FaultSense

- Developed a predictive maintenance model with Cascade Random Forest (F1-score: 80%) and built a FastAPI backend integrating PostgreSQL, MLflow, and Docker.

Tech: Python, Scikit-learn, FastAPI, PostgreSQL, MLflow, Docker

MedDistrib: Healthcare Workforce Distribution Recommendation System

May – Jun 2026

Data Scientist · Recommendation System Project

github.com/RandiBro234/MedDistrib

- Implemented a hybrid recommendation system (Knowledge-Based Scoring + Content-Based Filtering) to analyze healthcare workforce distribution priorities, integrated into an analytics dashboard.

Tech: Python, Pandas, Content-Based Filtering, Dashboard Analytics

AIRWISE: Real-Time Air Quality Monitoring Platform

Jul - Sep 2026

Data Scientist

github.com/RandiBro234/AIRWISE

- Built a real-time air quality monitoring platform that detects anomalies with Isolation Forest to deliver smart health advisories.
- Automated a background job (APScheduler) that fetches live pollutant data (PM2.5, PM10, O3) every 10 minutes, scores each reading for anomalies, and stores logs and anomaly records in Supabase.
- Served statistics and history through FastAPI endpoints to a dashboard with charts and gauges.

Tech: Python, FastAPI, APScheduler, Scikit-learn (Isolation Forest), Supabase (PostgreSQL), OpenWeatherMap API

ORGANIZATIONS

HIPMI PT PENS | *Division 1: Events, Organization & Cadre Development*

- Organized events and internal programs for HIPMI PT PENS, coordinating committees, schedules, and logistics.
- Supported member cadre development and organizational management to strengthen member engagement and leadership.

Badan Perwakilan Anggota (BPA) HIMIT PENS | *Public Relations (Humas)*

- Part of the legislative body of HIMIT PENS, handling public relations and communication for the institution.

VOLUNTEER

Liaison Officer, Dynamic ITDS PENS 2025

Liaison Officer, LKMM Tingkat Dasar PENS 2025

SKILLS

Programming & Query: Python, SQL, Excel

Data Analysis: Pandas, NumPy, Data Cleaning, Preprocessing, Feature Engineering, EDA, Scikit-learn

Machine Learning: Classification, Recommendation Systems, Anomaly Detection, Forecasting, Model Evaluation

Visualization: Power BI, Tableau, Dashboard Analytics

Database: PostgreSQL, MySQL, Supabase

Deployment & Tools: FastAPI, Flask, Docker, MLflow

Languages : Indonesian (Native), English (Elementary)
